- » System Monitor
- » USB Vaccination
- » External Device Scanning
- » External Device Blocking

• Product Update

- » Update through Internet and Proxy
- » Local Update Server
- » Always Active Update

• Internet Protection

- » Smart Firewall
- » Intrusion Detection & Prevention
- » Browser Protection
- » Block Drive-by-Downloads

• PC Tuneup Tools

- » Windows Temp Cleaner
- » Internet Temp Cleaner
- » Virtual Keyboard

K7 Antivirus Premium provides essential protection for your PC and data from advanced cyber threats such as malware, ransomware and email-based attacks. It prevents attacks through drive-by-downloads, pro-actively monitors the network for potential threats, and even automatically scans emails for hidden malware in the attachments. Additionally, K7's industry-leading performance and resource efficiency ensure your PC will be protected with almost no impact on performance.

Powered By MAT: Multi-layered Artificial intelligence Technology (MAT) combines real-time monitoring across multiple layers spanning Pre-Download, Pre-Execution, and Post-execution protection with Artificial Intelligence models that self-learn, classify, and act autonomously to block malicious/inappropriate websites, malicious activities, and ransomware.

Award Winning Protection: K7's proprietary scanning technology utilises signature- and behaviour-based analysis to achieve industry-leading detection rates for all types of malware, including ransomware.

Zero-Day Protection: K7 products feature the latest in heuristic malware detection technology enabling the highest levels of protection and detection of new and zero-day malware.

Zero Impact Security: International anti-malware testing bodies consistently recognise the K7 scanning engine as the fastest and most resource efficient, ensuring that your PC is protected, but performance is not noticeably impacted.

Simple to Install and Setup: At K7 we believe in keeping the product simple to install, configure, and update, ensuring that you can be cyber safe with a minimal amount of effort.

HIGHEST IN ZERO-DAY DETECTION

5 Sept 2018 www.shadowserver.org/wiki/pmwiki.php/AV/VirusMonthlyStats

K7's Cerebro scanning technology utilises sophisticated algorithms to achieve industry-leading detection rates for zero-day threats.

“Being a gamer, I have to switch off any security software when I am playing, and this has caused many problems for me. After I found K7 I find that I can be safe and still play my games, my system performance is not affected when i use K7.”

- Cybor_G_amer

LOWEST IMPACT

K7's scanning engine is regularly rated as the fastest and most resource efficient by international testing organisations. - AV Comparatives Performance Test April 2023
