

K7 Antivirus for Mac

Powered By MAT

Efficient real-time protection for macOS devices

Key Features

- Real-time Protection
- Total Malware Detection
- Detects Mac and non-Mac Threats
- Scheduled Scans

K7 Antivirus for Mac delivers reliable cyber threat protection combined with K7's world renowned efficiency. The high-speed, low-impact scanning ensures the performance of your Mac is not affected and your creativity is not interrupted.

Powered By MAT: Multi-layered Artificial intelligence Technology (MAT) combines real-time monitoring across multiple layers spanning Pre-Download, Pre-Execution, and Post-execution protection with Artificial Intelligence models that self-learn, classify, and act autonomously to block malicious/inappropriate websites, malicious activities, and ransomware.

Real-time Protection (K7Sentry): The real-time scanner analyses files in real-time as they are used and clears them if they are safe or blocks them if infected.

On-demand Scanning: The intuitive user interface enables you to run a malware scan on your device whenever you want with just one click.

Total Malware Detection: K7 Antivirus for Mac detects Mac and Windows threats including viruses, spyware, Trojans, worms, and adware that may be downloaded from the internet or received through email. Threats are detected on your macOS device and network and external drives.

Scheduled Scans: Run scheduled/background antivirus scans at regular intervals or specific times to ensure you are always protected against any new threats that may have entered your device.

Quarantine Manager: Infected files are isolated and all access to them is blocked to ensure complete protection against malware.

Updates: Protection against the latest cyber threats is ensured through quick and daily malware definition updates.

Notifications: Pay immediate attention to threats with OS-X style notifications.

About K7 Antivirus
