- » Update through Internet and Proxy
- » Local Update Server
- » Always Active Update

• Internet Protection

- » Smart Firewall
- » Intrusion Detection & Prevention
- » Browser Protection
- » Block Drive-by-Downloads
- » Wi-Fi Advisor
- » Website Filtering

K7 Total Security provides advanced protection for your PC and data from cyberthreats such as malware, ransomware, phishing, and other email-based attacks. It prevents attacks from malicious websites, pro-actively monitors the network for potential threats, and even automatically scans emails for hidden malware in the attachments. K7's industry-leading performance and resource efficiency means your PC will be protected with almost no impact to its performance. Advanced parental controls help keep your kids safe while on-line, and Total Security's PC Tune-up tools keep your PC operating at peak performance.

Protect your Family: K7 Total Security lets you control and monitor application and internet usage of your family. You can restrict or block and set the exact time for internet access, apps and games.

Internet Protection: Advanced artificial intelligence and machine learning algorithms enable K7 to achieve the highest level of protection from malicious websites and Internet-based malware attacks.

Ransomware Protection: An indigenously developed advanced solution to protect you and your data from ransomware. K7 Computing is the first Cybersecurity solution provider to devise a near fool-proof mechanism to protect against ransomware attacks.

Zero-Day Protection: K7 products feature the latest in heuristic malware detection technology enabling the highest levels of protection and detection of new and zero-day malware.

HIGHEST IN ZERO-DAY DETECTION

Key Features
