- » Update through Internet and Proxy
- » Local Update Server
- » Always Active Update

• Internet Protection

- » Smart Firewall
- » Intrusion Detection & Prevention
- » Browser Protection
- » Block Drive-by-Downloads
- » Wi-Fi Advisor
- » Website Filtering

• Web Protection

- » Safe Search (Cloud-based annotation of search URLs)
- » Safe Surf (Cloud-based website verification and blocking of Unsafe sites)
- » Anti-Spam
- » Phishing Site Blocker
- » Malicious Site Blocker
- » Identity Protection

K7 Ultimate Security provides the same award-winning protection from advanced cyberthreats and malware as K7 Total Security, but adds protection for your mobile devices, a backup function to protect against data loss, and multi-device and -OS protection. K7 Ultimate Security's integrated data backup feature for Windows protects you against the loss of important data by automatically backing up your data, allowing you to restore anytime in case of data loss. The multi-device and OS protection enables you to protect your family's devices with a single multi-user subscription.

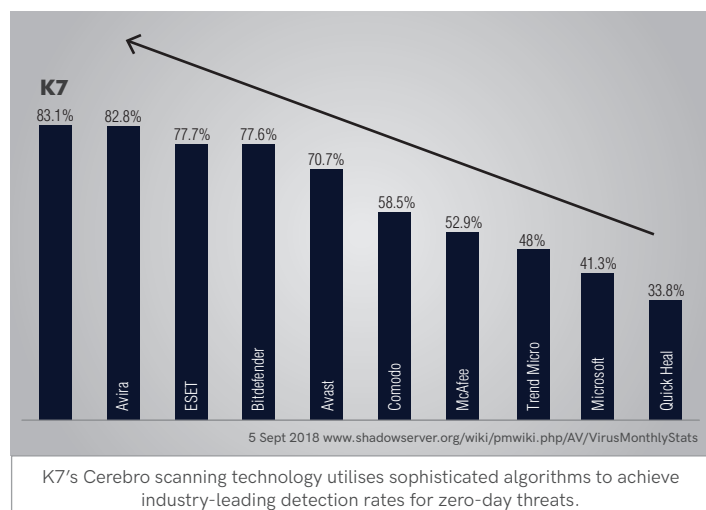

Powered By MAT: Multi-layered Artificial intelligence Technology (MAT) combines real-time monitoring across multiple layers spanning Pre-Download, Pre-Execution, and Post-execution protection with Artificial Intelligence models that self-learn, classify, and act autonomously to block malicious/inappropriate websites, malicious activities, and ransomware.

Ransomware Protection: K7 Ultimate Security provides industry leading protection from new and existing ransomware attacks while also providing you with data backup and restore features as an extra protection against data loss.

Zero-Day Protection: K7 products feature the latest in heuristic malware detection technology enabling the highest levels of protection and detection of new and zero-day malware.

Webcam Protection: Keep unauthorised applications and hackers from accessing your webcam and spying on you without your knowledge.

HIGHEST IN ZERO-DAY DETECTION

DATA SHEET

Data Locker: Keep your files and data in the K7 Data Locker to prevent malicious apps from accessing those files without your knowledge.

Backup and Restore: Gone are the days when backup and restore were features that were required by organisations only. We now have so much personal information about ourselves, our finances, and our family that it becomes critical to take backups regularly. This adds another level of protection to your sensitive data.

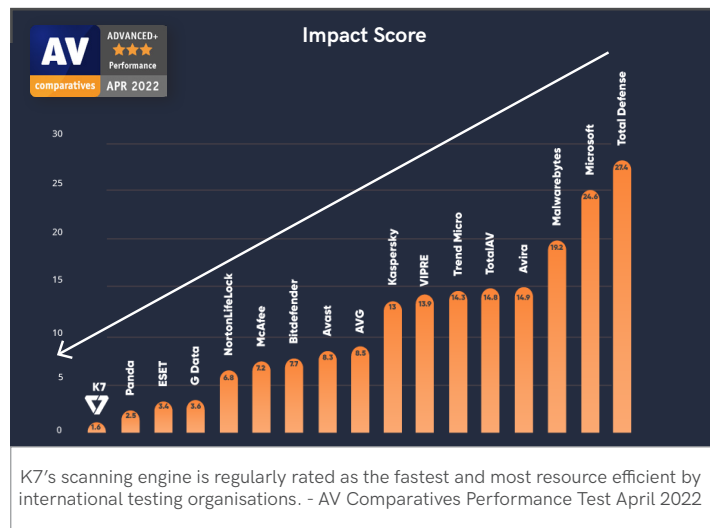

Financial Security: Safe Surf feature ensures that online and browser-based attacks can't access or mine your passwords or login credentials, and secures your online transactions related to banking, payment services, and online shopping.

Mobile Protection: A suite of features that helps you manage and secure your mobile devices, including anti-theft and device tracker.

Zero Impact Security: K7's industry leading performance and resource efficiency deliver PC and mobile device protection with almost no impact on device or network performance.

Simple to Install and Setup: At K7 we believe in keeping the product simple to install, configure, and update, ensuring you can be cybersafe with minimal effort.

LOWEST IMPACT

Min. System requirements : Microsoft Windows XP SP3 (32 bit), Windows Vista SP2, Windows 7, Windows 8 and 8.1, Windows 10, Windows 11 • 1GB of RAM • 1GB of free hard disk space • Internet connection for activation and updates
